INTRODUCTION

Information obtained from a recent [] report indicated the possibility of a microwave relay link between the cities of Krustpils and Velikiye Luki, USSR. An examination of [] photography since [] confirms the existence of a television/microwave tower in Velikiye Luki and another microwave facility 25 nautical miles west at Mayevo (Figure 1). No additional microwave facilities are observed on the available coverage, which is incomplete and of poor interpretability.

BASIC DESCRIPTION

The tower heights of the following microwave facilities are considered accurate to within plus or minus 10 feet or 5 percent, whichever is greater. The orientation and type of the microwave elements could not be determined from the photography.

1. Velikiye Luki TV/Microwave Facility
56-20-10N 030-28-40E

25X1A

This facility, which was observed under construction in early [] consists of one 750-foot TV/microwave tower, one control building, and one support building.
